Dmytro Tarasenko

Senior / Lead Unity Developer

nemesidik@gmail.com Dmytro Tarasenko

Profile

Senior/Lead Unity Developer with 13+ years of hands-on experience building mobile and PC games. Specialized in gameplay systems, game architecture, multiplayer features, live operations, and performance optimization. Experienced in delivering games from prototype to release and supporting long-term live products.

Key Skills

- Unity
- C#
- .NET
- Gameplay Systems
- Game Architecture
- Performance Optimization
- Profiling & Debugging
- Team Leadership
- CI/CD
- UniTask
- Git
- Client-Server Architecture
- Mobile Game Development
- Addressables
- REST APIs
- LiveOps
- Multiplayer (Mirror)
- Firebase

Professional Experience

Senior Unity Developer 08/2024 – 08/2025
Smart Project Development
Tech Stack: Unity, C#, Firebase Analytics, AppLovin MAX, Android, Mobile Games, UI/ UX, Performance Optimization
Achievement: Implemented features that increased ad revenue by 9% and optimized loading performance, reducing game and level startup times by 27%.
Responsibilities:
- Developed gameplay systems, UI/UX features, animations, and VFX for the mobile puzzle game Kitty Sort
- Integrated Firebase Analytics and AppLovin MAX monetization solutions
- Profiled and optimized performance across Android/iOS devices

Interim Chief Technology Officer 05/2024 – 08/2024
Utin Computer
Tech Stack: Unity, C#, Software Architecture, Technical Leadership, Code Review, Development Processes
Achievement: Improved engineering consistency and streamlined development workflows, increasing development speed by 32% and code quality by 40% through standardized technical practices and architectural reviews.
Responsibilities:
- Established technical standards and engineering workflows across multiple projects
- Reviewed architectural decisions and supported development teams
- Improved development processes, code quality, and project delivery practices

Lead Unity Developer 01/2023 – 12/2023
Whimsy Games
Tech Stack: Unity, C#, Mirror, Multiplayer, Client-Server Architecture, REST APIs, Mobile Games
Achievement: Designed and delivered the core gameplay and networking architecture of a multiplayer game, enabling scalable feature development and long-term maintainability.
Responsibilities:
- Developed a multiplayer brawler game from prototype to production
- Designed and implemented gameplay systems and client-server architecture using Mirror
- Integrated localisation, QR-code scanning, and map-based gameplay features
- Performed technical planning, code reviews, and mentoring across the project

Lead Unity Developer 03/2017 – 12/2022
Murka
Tech Stack: Unity, C#, LiveOps, Monetization, Firebase, Mobile Games, Performance Optimization, REST APIs, Analytics
Achievement: Delivered gameplay, monetization, and LiveOps improvements that increased player retention by 30% and annual revenue by 12%, while improving runtime stability from 83% to 99% and streamlining development workflows.
Responsibilities:
- Developed and maintained large-scale social casino products (Slots on Tour, Scatter Slots)
- Implemented gameplay systems, LiveOps features, and monetization content
- Improved runtime stability and significantly reduced crash rates in production
- Improved development workflows, documentation, and onboarding processes
- Mentored developers and supported cross-functional collaboration

Lead Unity3D Developer 2015 – 2017
eJaw
Tech Stack: Unity, C#, VR, Mobile Games, PC Games, Gameplay Systems
- Developed a space arcade game from concept to release
- Built gameplay systems and production features for a Kickstarter RPG project
- Contributed to multiple VR projects across different genres
- Mentored developers and participated in technical decision-making

Unity3D Developer 08/2014 – 12/2015
Jutiful
Tech Stack: Unity, C#, Rapid Prototyping, Gameplay Systems, Mobile Games
- Developed investor demos, gameplay prototypes, and proof-of-concept projects
- Created game content and implemented features for a mobile puzzle title
