| • Game Architecture | • Performance Optimization | • Live-Ops | • Firebase |
| • MaxSDK | • Team Leadership | • R&D | |

Professional Experience

Unity Developer 08/2024 – 08/2025

Smart Project Development

- Developed core gameplay systems, UI/UX logic, animations, and visual effects for the mobile game Kitty Sort
- Integrated advertising and analytics solutions using Firebase and MaxSDK
- Performed profiling and performance optimization for Android devices

Interim Chief Technology Officer 05/2024 – 08/2024

Utin Computer

- Led the technical direction of a mid-size game development team (~10 developers)
- Defined architecture standards, engineering processes, and technical decision-making
- Owned technology strategy, production stability, and delivery quality across projects

Lead Unity Developer 01/2023 – 12/2023

Whimsy Games

- Designed and led development of a multiplayer brawler from scratch
- Built and maintained client-server architecture using Mirror
- Researched and integrated plugins for localisation, QR-code reading, and real-world map features
- Managed a development team of 5 people

Lead Unity Developer <i>Murka</i> • Led development of a slot project from scratch to long-term live operations • Improved runtime stability to approximately 99%, significantly reducing crash rates • Was part of the R&D; team, developing gameplay and monetization offers • Introduced improved documentation, onboarding, and feature development processes • Managed teams of up to 10 developers and coordinated cross-functional teams (~20 people)	03/2017 – 12/2022
Lead Unity3D Developer <i>eJaw</i> • Developed a space arcade game from scratch to launch • Prepared a Kickstarter version of an AAA RPG project • Worked on multiple VR projects across different genres • Managed a development team of 3 people	2015 – 2017
Unity3D Developer <i>Jutiful</i> • Created investor demo projects and interactive prototypes • Developed levels and fixed bugs for a puzzle game	08/2014 – 12/2015
Unity3D Developer <i>Studio Vision</i> • Developed a turn-based strategy game from scratch • Contributed to development of a slot-like game project	02/2015 – 09/2015
Unity3D Developer <i>TechinForm</i> • Developed a Drag Racing game for the NHRA association from prototype to release candidate • Created multiple prototypes including arcade, platformer, tower defense, and racing games • Built multiplayer mini-projects including SeaFight, TicTacToe, and Billiard	02/2013 – 07/2014

Education

Computer & Information Technology <i>Donbas State Engineering Academy</i>	2008 – 2013
