

Dmytro Tarasenko

Lead Unity Developer / CTO

 Kyiv, Ukraine  nemesidik@gmail.com  <https://wolfsOng.github.io>

 [Dmytro Tarasenko](#)  [WolfsOng](#)

Profile

Lead Unity Developer with 13+ years of experience in mobile and PC game development. Strong background in building scalable architectures, optimizing performance, and supporting long-term live projects. Proven technical leader with experience delivering projects from prototype to release, stabilizing production systems, and leading development teams across multiple game genres.

Key Skills

- Unity
- Game Architecture
- Multiplayer (Mirror)
- LLM Development Workflows
- R&D
- C#
- Team Leadership
- AI Code Review
- Performance Optimization
- Systems thinking
- Mobile & PC Games
- AI-Assisted Development
- Prompt Engineering
- Live-Ops
- Debugging & Profiling

Professional Experience

Unity Developer

08/2024 – 08/2025

Smart Project Development

- Developed core gameplay systems, UI/UX logic, animations, and visual effects for the mobile game Kitty Sort
- Integrated advertising and analytics solutions using Firebase and MaxSDK
- Performed profiling and performance optimization for Android devices

Interim Chief Technology Officer

05/2024 – 08/2024

Utin Computer

- Led the technical direction of a mid-size game development team (~10 developers)
- Defined architecture standards, engineering processes, and technical decision-making
- Owned technology strategy, production stability, and delivery quality across projects

Lead Unity Developer

01/2023 – 12/2023

Whimsy Games

- Designed and led development of a multiplayer brawler from scratch
- Built and maintained client-server architecture using Mirror
- Researched and integrated plugins for localisation, QR-code reading, and real-world map features

- Managed a development team of 5 people

Lead Unity Developer

03/2017 – 12/2022

Murka

- Led development of a slot project from scratch to long-term live operations
- Improved runtime stability to approximately 99%, significantly reducing crash rates
- Was part of the R&D; team, developing gameplay and monetization offers
- Introduced improved documentation, onboarding, and feature development processes
- Managed teams of up to 10 developers and coordinated cross-functional teams (~20 people)

Lead Unity3D Developer

2015 – 2017

eJaw

- Developed a space arcade game from scratch to launch
- Prepared a Kickstarter version of an AAA RPG project
- Worked on multiple VR projects across different genres
- Managed a development team of 3 people

Unity3D Developer

08/2014 – 12/2015

Jutiful

- Created investor demo projects and interactive prototypes
- Developed levels and fixed bugs for a puzzle game

Unity3D Developer

02/2015 – 09/2015

Studio Vision

- Developed a turn-based strategy game from scratch
- Contributed to development of a slot-like game project

Unity3D Developer

02/2013 – 07/2014

TechinForm

- Developed a Drag Racing game for the NHRA association from prototype to release candidate
- Created multiple prototypes including arcade, platformer, tower defense, and racing games
- Built multiplayer mini-projects including SeaFight, TicTacToe, and Billiard

Education

Computer & Information Technology

2008 – 2013

Donbas State Engineering Academy
